Lakewood Instruments

We thank you for your selection and purchase of a Lakewood Instruments product.

With proper care and maintenance, this device should give you many years of trouble-free service. Please take the time to read and understand this Installation and Operation Manual, paying special attention to the sections on **OPERATION** and **MAINTENANCE**.

If, in the future, any parts or repairs are required, we strongly recommend that only original replacement parts be used. Our Customer Service Department is happy to assist you with your parts or service requests.

- Lakewood Instruments Customer Service and Technical Support Departments can be reached by calling (800) 228-0839 or faxing (414) 355-3508, Monday through Friday, 7:30 a.m. 5:00 p.m. CST.
- Mail should be sent to:

Lakewood Instruments 7838 North Faulkner Road Milwaukee, WI 53224 USA

INTRODUCTION

NDIG

The Model NDIG Node is a LonWorks[®]-compatible node that uses twisted pair communications. It accepts four digital inputs which can be tied into most 2000 series controllers. Up to two NDIG nodes may be installed on the 2000 series controller for a total of eight digital inputs.

NOTE: To use the NDIG with a 2000 series controller it must have the NIN option and contain Rel 98 Firmware. All controllers shipped after 1 June 98 will have Rel 98 firmware.

Additional water meters and relay outputs.

After a NDIG is installed, not only will you be able to view external digital inputs you will also be available to control relays based on the external input. In addition the first node of the possible two that can be installed allows you to configure input 1 and 2 for water meters.

LONWORKS is a registered trademark of Echelon Corporation.

Specifications

Inputs Four digital inputs. Channels one and two may be used as water

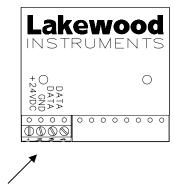

meter inputs. Contacting head or open collector type meters may

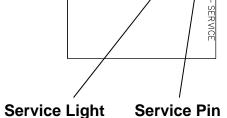

be used.

Network wiring distance

400 meters from furthest node

Power 24 VDC

0

Network and Power connections

Connection to NIN and other nodes as well as 24 VDC.

Indicates node Installs node on network. status.

INSTALLATION

Checking

Inspect the shipping carton for obvious external damage. Note on the carrier's bill-of-lading the extent of the damage, if any, and notify the carrier. Save the shipping carton until your Node is started up.

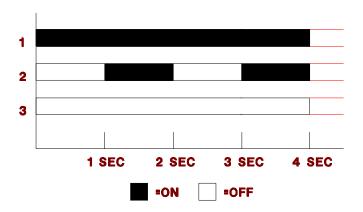

If shipping damage has occurred, call the Lakewood Instruments Customer Service Department at (800) 228-0839 and return the controller to the factory in the original carton.

Connections

The NIN option is required on the 2000 series controller for the NDIG to operate. The NIN option provides power and two way communications to the NDIG. Refer to the drawings in the back of this manual for wiring details.

Service Light

The service light is used for installation of the node and for troubleshooting. Below is a chart of what the service light might indicate during operation.

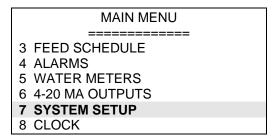

Behavior	Description	Resolution
1	Bad Node	Replace Node
2	Node is unconfigured,	Install Node
3	Node is running normally	none
3	Node does not have power	Check power supply

Light will also be on while the service button is pressed.

Operation with 2000 Series Controllers

Before it can be used, the NDIG must be installed into the software of the controller.

Under the Main Menu,

highlight **SYSTEM SETUP**, then press **ENT**. You should see the following screen:

Highlight **NODE INSTALLATION**, then press **ENT**. You should see the following screen:

NODE INSTALLATION		
=======================================		
1	INSTALL A NEW NODE	
2	DE-INSTALL A NODE	

Highlight **INSTALL A NEW NODE**, then press **ENT**. You should see the following screen:

Select which node to install.

NOTE: YOU MUST ASSIGN YOUR NDIG TO DIGITAL INPUTS (4).

The following screen should appear:

PRESS SERVICE PIN

PRESS ANY KEY

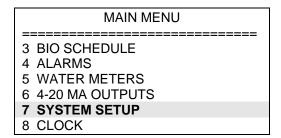

Momentarily press the Service Pin on the node to be installed. The Service Light should turn on while the Service Pin is pressed. After the Service pin is released press any key on the key pad and the node will be installed.

CONFIGURATION

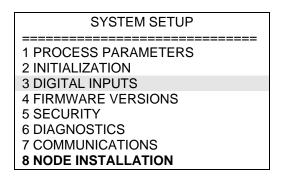

Configuration of Node

For the NDIG to work properly with different sensors it must be configured properly.

Under the Main Menu,

highlight **SYSTEM SETUP**, then press **ENT**. You should see the following screen:

Highlight **DIGITAL INPUTS**, then press **ENT**. You should see the following screen:

WHICH DIGITAL INPUT?			
=======================================			
1 DIN1			
2 DIN 2			
3 DIN 3			
4 DIN 4			

Highlight the appropriate input and press ENT. You should see the following screen:

You may change the name of the input to be something other than DIG1. To do this select CHANGE MY NAME then press **ENT**.

OLD NAME= DIN1 NEW NAME= DIN1

Use the \uparrow or \downarrow keys to change the character. Press **ENT** to go to the next character.

Highlight **CHANGE INPUT TYPE** and press **ENT**. You should see the following screen:

Highlight ALARM INPUT and press ENT. You will see the following screen:

ALARM INPUT

The digital input is configured to be an Alarm Input.

To configure for water meter input do the following:

Highlight WATER METER and press ENT. You will see the following screen:

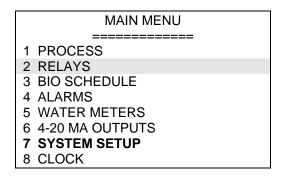

WATER METER

The digital input is configured to be a water meter input. Refer to your 2000 series instruction manual for configuring the water meter input.

Configuration of Node with Relays

The NDIG can be used to control relays in the 2000 series controller or the NRLY node.

Under the Main Menu,

highlight RELAYS, then press ENT. You should see the following screen:

WHICH RELAY?				
=======================================				
1 BLOW				
2 RLY2				
3 RLY3				
4 RLY4				

Highlight the appropriate relay , then press **ENT**. You should see the following screen:

RLY2		
=		
1 DISABLE		
2 SETPOINT		
3 WATER METER		
4 PERCENT BLOWDOWN		
5 PERCENT OF TIME		
6 FEED SCHEDULE		
7 ALARM RELAY		
8 CHANGE MY NAME		
9 SCHEDULE LOCKOUT?		

Highlight **ALARM RELAY** , then press **ENT**. You should see the following screen:

Highlight the appropriate Input , then press **ENT**. You should see the following screen:

WHICH ALARMS?			
=======================================			
1	DIN1: CONTACT CLOSE		
2	DIN2: CONTACT CLOSE		
3	DIN3: CONTACT CLOSE		
4	DIN4: CONTACT CLOSE		

Highlight the appropriate input, then press **ENT**. You should see a * placed next to the choosen input. Press **ENT** to remove the *. You may select any combination of inputs to actuate the relay.

Maintenance and Technical Service

Technical Service

Technical Support for Lakewood Instruments can be reached by calling (800) 228-0839 or faxing (414) 355-3508, Monday through Friday, 7:30 a.m. – 5.00 p.m. CST.

<u>NOTE</u>: IF YOU CALL FOR TROUBLESHOOTING HELP, PLEASE HAVE THE MODEL NUMBER, SERIAL NUMBER, AND ANY OPTIONS PERTAINING TO YOUR UNIT AVAILABLE FOR REFERENCE.

Mail and returns should be sent to:

Lakewood Instruments 7838 North Faulkner Road Milwaukee, WI 53224 USA

When any merchandise is to be returned to the factory, please call and obtain a Return Goods Authorization (RGA) number and have the following information available:

- Customer's name, address, telephone and fax numbers (shipping and billing).
- A hard copy purchase order number for cases where repairs or parts are required that are not under warranty.
- A contact person's name and telephone number to call if the equipment is beyond repair or to discuss any other warranty matter.
- Equipment model and serial numbers.
- Reason for return, e.g., repair, warranty, incorrect part, etc.

We will then fax to your attention an RGA form that must accompany the returned item.

<u>NOTE</u>: THE RGA NUMBER MUST BE CLEARLY WRITTEN ON THE OUTSIDE OF THE PACKAGE(S) BEING RETURNED.

ANY ITEMS SENT BACK TO THE FACTORY
WITHOUT AN RGA NUMBER WILL BE REFUSED
AND RETURNED TO SENDER

Troubleshooting

PROBLEM	WHAT THIS MEANS	CORRECTIVE ACTION
Screen Displays "DINx	The contact on the digital	None, this is normal
CONTACT CLOSED"	input is closed.	operation.
Service light flashes on node	Node is not installed	Install the node.
Watermeter values do not	NDIG is not seeing a input	Check wiring.
change	from the water meter	Check for proper water meter configuration If using contacting head, remove wires and manually create a contact. If display increments, water meter is not functioning.
LRWS does not display flow rate for water meter	Digital input is configured for contacting head watermeter.	No flow rate can be displayed on LRWS with contacting head water meter.
