

Options for Connecting to Controllers

You don't have to replace your controller in order to get some level of remote data access! Lakewood offers two systems for either data logging and tracking or full remote control. The OnSight Remote Access System works for all 1500 series controllers, while the EZWeb Wireless System allows full remote control of NexSys Systems.

OnSight Remote Access System

EZ Web Wireless System

Choose the system that is right for you and for your customer's needs. The benefits to remote data logging and control include:

- Improved service reports with data and graphs that allow you to show results.
- Check in on a system remotely to potentially prevent an unscheduled site visit.
- Give direction to site personnel for improved system operation.
- Track chemical levels remotely to ensure timely chemical replacements.

OnSight Remote Access System

- 1500 Series Controllers with 4-20 mA outputs can be connected.
- Total of four analog inputs plus four digital inputs can be connected.
- Convenient web interface for access from phone, tablet or pc.
- Built in CSV data files and graphs for improved service reporting.
- Email and text alerts possible at your discretion.

EZ Web Wireless System

- **Full Remote Control** of NexSys controllers.
- Complete range of connected I/O are monitored automatically.
- Convenient web interface for access from phone, tablet or pc.
- Built in CSV data files and graphs for improved service reporting.
- Email and text alerts possible at your discretion.
